Full-time tenured Research Associate

Behavioral Industrial Organization

INRAE – GAEL – Grenoble

We aim to hire a researcher in theoretical or empirical IO, with a focus on behavioral IO. We look for a researcher able to integrate behavioral results on food production and consumption with formal modeling of the supply strategy of industrial players.

A background in theoretical and empirical industrial economics, and ideally in fields related to behavioural industrial economics, is required. More generally, it is recommended to have a good training in micro-economics and econometrics in order to easily assimilate recent advances in behavioural economics and structural econometrics. Your scientific track should demonstrate your ability to publish your research results in good international academic journals.

The Grenoble Applied Economics Laboratory (GAEL) is a mixed research unit grouping researchers from INRAE, CNRS, the University Grenoble-Alpes and the Grenoble INP engineering school. The laboratory has 50 permanent staff, including just over 40 researchers, faculty and dedicated support staff. The research carried out within the unit is organised into three research groups: consumption, innovation and energy.

The National Research Institute of Agriculture, Food research and the Environment (INRAE) is the leading European agricultural research institute. INRAE conducts applied research for a balanced diet and for a preserved environment.

The position is tenured and implies no teaching load. You are free to teach but not required to do so. The hiring process is managed by a centralized formal procedure (concours) organized by INRAE. The formal procedure will be open starting from January 30th, 2020; the submission deadline is March 5th, 2020. Candidates must have defended their PhD by the deadline. All information on the formal procedure followed for this position here.
